## MBA FOR LAWYERS TOPICS:

US GAAP Statements including:

- Balance Sheets
  - Statements of Cash Flow
  - Statements of Shareholder Equity
  - Notes to Financial Statements
- Valuation Theory
- Buy-Sell Disputes
- Mergers & Acquisitions

**MBA FOR LAWYERS (Advance Course Offerings)** You went to law school. You may not have gone to business school. Having the capability to understand business and financial concepts is a real advantage. As corporate counsel, your job often includes advising management on legal issues which impact important business decisions. Doing this effectively may require you to understand key financial concepts, such as information presented in financial statements and valuation methods used in strategic decision making. In collaboration with Deloitte, we will host an advance financial acumen program. The most effective in-house attorneys understand, not only, the breadth of legal issues facing their companies, they also recognize the importance of how those issues affect can influence strategic business decisions.

The program will begin with a refresher of the basics of accounting concepts, financial statements, and US GAAP accounting principles as well as valuation principles and theory (i.e. what is valuation, who needs it, and common litigation issues). The program will feature an opportunity for you to apply what you have learned in the context of a fictitious corporation— discussing their financial statements as well as equity analysts' reports and valuation principles relevant to the health care and sports/entertainment industries. The program will also feature an opportunity for you to apply what you have learned using a short case study that will be completed in breakout groups.
